DynPG Version 4.5.1 ab sofort verfügbar!

Das Update bringt neben mehr Sicherheit und besserer Kompatibilität des Frontend Editiermodus auch eine neue Funktion in die Dateiverwaltung: neu können darin Wasserzeichen zu Bildern hinzugefügt werden!

Das neue DynPG 4.5.1 ist nun verfügbar!

Das Update bringt neben mehr Sicherheit und besserer Kompatibilität des Frontend Editiermodus auch eine neue Funktion in die Dateiverwaltung: neu können darin Wasserzeichen zu Bildern hinzugefügt werden! Außerdem behebt das Update viele kleine Fehlerchen die sich im Release 4.5 eingeschlichen haben.

Die wichtigsten Neuerungen im Detail:

- Wasserzeichen in der Dateiverwaltung einfügbar.
- Erhöhte Sicherheit.
- Kompatibilitätsprobleme des Frontend-Editiermodus behoben.
- Diverse Bugfixes.

Changelog:

- bugfix: read out GD version correctly
- bugfix: IE robust TinyMCE external toolbar positioning (this resolves the "jumping toolbar" bug)
- added: enabled external links without dynpg counter
- bugfix: language variable sanitize and allow only valid languages to be set
- bugfix: failure in is_group_public due to the mysql_real_escape_string() escaping
- bugfix: utf8_decode the name of a duplicated group
- new: ctrl + s in group formulars with tinyMCE possible
- changed: "keep linebreaks" is no longer default in the "paste" plugin of TinyMCE
- added: enhanced backend security for mysql calls with real_escape
- bugfix: checked if orderby and sort parameter are valid, otherwise choose default
- bugfix: real-escape GET parameters
- bugfix: do NOT quote "matches" in the menu engine
- add: turn off/on error reporting in the backend relative to the configuration of "Debug Mode" in the config.php
- added: enhanced backend security for mysql calls with real_escape
- added: enhanced backend security for mysql calls with real_escape
- bugfix: fixed backend security issues (SQL injection and XSS) if logged in only
- bugfix: article options worked buggy
- bugfix: back and forward button missing in formular editor
- bugfix: initialize \$_Var as array if set to string, because of cannot use scalar value warning
- changed: renamed new template variable from _nohtml_notags to _notags_nohtml for write_articles method
- added: write_article template variabel enhanced with _notags (without tags) and _nohtml_notags (withoug tags and replaced htmlentities)
- bugfix: w3c correction - ie conditional comment style without inside comment tags
- added: iframe option enhanced with custom size from url parameters width + height
- bugfix: duplicated text contained stripped slashes
- bugfix: add default styles to toolbar which cannot be overwritten by other css
- bugfix: removed display="inline" from breadcrumb
